

Department of Sustainability

Our school eco-code, “taking care of our school, taking care of our world” is at the heart of all we do in the Department of Sustainability. The main focus of our work is being responsible for Eco-Schools and maintaining the Platinum+ standard that we have worked so hard to achieve over recent years.

Our department is involved with conducting school environmental reviews, creating annual action plans and monitoring progress towards reaching our goals. The department provides the opportunity to raise awareness and empower our pupils to drive change in a variety of areas such as biodiversity, energy, global citizenship, litter, healthy living, transport, waste, water and marine.

Our chosen eco project this year focuses on biodiversity as we have recently begun keeping bees on the school grounds. We will be looking to purchase and plant native plants to support our fabulous little pollinators over the year ahead.
